

How to use your Tread Depth Card.

Your customers' safety is in your hands.

Now you're a card carrying tyre expert, it's easy to quickly get a clear idea of a tyre's condition.

Simply insert the bottom of the card into the grooves of the tyre and see how much of the card is visible above the tyre.

GREEN - If only the green part is visible, the tyre is still in good shape.

YELLOW - If you can see yellow, the tyre will need to be replaced soon.

RED - If red is visible, the tyre is worn and needs to be replaced immediately.

It's easy for you to use, and it's a useful visual tool to show a customer how safe their tyres are.
